family business association ATLANTIC

FAMILY ENTERPRISE CANADA

Family Business Atlantic is pleased to announce a strategic partnership with Family Enterprise Canada — strengthening the support available to family enterprises across Atlantic Canada.

Family businesses face challenges that rarely have one-size-fits-all solutions. Governance, succession, family dynamics, and leadership development are complex and deeply personal. Through this partnership, members will benefit from coordinated regional support and national expertise, ensuring the right resources are available at every stage of your journey.

Family Business Atlantic remains your trusted, relationship-driven partner rooted in Atlantic Canada's business community.

Through FBA, members gain:

- Peer Groups offering confidential, facilitated spaces for shared learning
- Regionally relevant programming tailored to Atlantic Canadian realities
- Local advisor and member connections
- Exclusive group benefits plan designed to suit suit the needs of SMEs

Family Enterprise Canada complements this regional foundation with national leadership and broader perspective.

Through FEC, members access:

- National research and thought leadership on family enterprise trends
- Advanced education and professional development opportunities
- National conferences and signature events
- Insights on policy and issues impacting family businesses in Canada

What This Partnership Means for You

Together, FBA and FEC provide:

- **Clarity**: Know where to turn as your family and business evolve.
- **Continuity**: Support at every stage — from founder-led enterprises to multi-generational families.
- **Confidence**: Layered guidance combining regional relationships with national expertise.
- **Community:** Connections locally and nationally with peers navigating succession, governance, growth, and next-generation development.

Join us March 2 from 12PM-1PM AST with FBA President Leslie Bishop & FEC CEO Steve Beauchesne for an online lunch & learn session to explore how family enterprises can benefit from being connected to both organizations.
